Non-Invasive
Body Contouring In
25 Minutes

SculpSure™

SculpSure is a non-invasive body contouring system for the reduction of stubborn fat in areas such as the abdomen and love handles.

The 25 minute procedure destroys 24%¹ of treated fat cells without surgery. SculpSure is ideal for people with trouble spots, particularly those that seem resistant to diet and exercise.

HOW DOES IT WORK?

Applicators will be placed on your desired treatment area to administer light-based energy, which treats and injures fat cells. In the weeks following treatment, the body naturally eliminates the injured fat cells, resulting in a slimmer appearance.

WHAT SHOULD I EXPECT DURING THE 25 MINUTE TREATMENT?

Most patients feel a tingling sensation intermittently throughout the treatment which is well-tolerated.³

WHEN WILL I SEE RESULTS?

Many patients start to see results as early as 6 weeks following treatment as the body begins to eliminate the destroyed fat cells; optimal results are usually seen at 12 weeks.

HOW LONG WILL THE RESULTS LAST?

Fat cells are permanently destroyed during the treatment.

25 minute procedure

Treat multiple areas at once

OVER 90% patient satisfaction^{2,3}

Works on all skin types

No downtime
